Topline Summary:

Between October 11th and October 19th, APRL conducted a full survey of Colorado voters. Questions covered the statewide contests and several propositions on the 2022 ballot, evaluations of state and national figures, and public opinion about a variety of other issues. In this initial topline report, we focus on the statewide contests, the ballot measures, the public's approval of political figures, and Coloradans' attitudes toward elections and election processes.

A Note on Partisan Breakdowns: In the summary discussion and tables that follow (where we present numbers by partisanship), we construct the splits using *self-reported partisanship* collected from respondents; this was measured via a traditional 7-point scale. We then categorize "leaning partisans" in with other partisans – thus, the category of

Numbers may not sum to 100 due to rounding; information on partisanship was missing for a handful of respondents

Statewide Contests:

We find Democrats leading in the three statewide contests we polled. Looking at likely voters, Polis has a substantial lead in the gubernatorial contest (57-41), as does Bennet in the Senate election (56-42), and Griswold in the race for Secretary of State (54-43). We see the expected partisan splits in support for these contests, though one story that emerges centers around gender: Polis leads 63-35 among likely female voters in Colorado, with Bennet (62-36) and Griswold (61-35) claiming similar gender splits. Democrats hold a modest lead among likely voters (52-45) when we ask about a generic Congressional ballot.

Ballot Measures:

We polled on 3 measures that are appearing on the ballot before Coloradans in 2022.

While grounding our question wording in information provided in the [2022 State Ballot Information Booklet](#), we included a survey question-wording experiment on one item to better understand how the language of the ballot propositions might affect voters' behavior.

Proposition GG: Prop 5 gs0 te92 reW*nBT/F4 12 Tf1 0 0 1 529.06 486.91 Tm0 G[]TJETProp

Republican voters, who showed a 15% increase in opposition when taxable income was mentioned before the deliverable of free meals to students.

Approval of Political Figures:

Looking at all adult Coloradans (not just likely voters), approval of Biden largely mirrors [national averages](#) (i.e., high 30s to low 40s), though it is highly divided by partisanship. Polis receives better marks (56% approval vs. 32% disapproval; 12% “not sure”), though this is also divided along partisan lines. Hickenlooper posts a lower approval than Bennet (41% vs. 49%) – these overall numbers mask what is considerably higher approval among Democrats for Bennet (82%) vs. Hickenlooper (68%). Finally, we also asked Coloradans to give their approval of Representative Lauren Boebert, who has emerged as a national figure over the past couple of years. Boebert’s overall approval is low among Coloradans, where she is strongly disliked by Democrats (73% disapproval) and fairly well-liked by Republicans (58% approval).

Confidence in the Electoral Process/Experiences with Mail Voting

We asked Coloradans about whether they felt elections both 1) across the country and 2) in Colorado would be conducted **fairly and accurately**. Overall, 54% of Coloradans agreed they would be conducted fairly nationally (with 20% saying they weren’t sure), while 71% agreed they would be fairly in Colorado. In a pattern often repeated, we see substantial differences by partisanship – 73% of Democrats agreed elections would be fair and accurate when asked about the country as a whole, while only 41% of Republicans said the same. When asked about Colorado’s elections, 92% of Democrats expressed agreement with a statement, but only 57% of Republicans agreed (Independents posted 53% agreement). Most Coloradans agreed (75%) that in Colorado all citizens who want to vote in the elections will be able to do so.

We also asked **about the legitimacy of the 2020 presidential election, and the need for electoral reforms** in the wake of the 2020 elections (both “across the states” and in Colorado in particular). 63% of Coloradans agree that Biden legitimately won enough votes to be elected President (though this number is polarized by partisanship, with 95% of Democrats agreeing, and only 34% of Republicans agreeing).

A majority of Coloradans agreed that the 2020 election showed we needed to make changes to voting laws “across states” (62%), though only 40% agreed such reforms were needed in Colorado. However, again the partisan splits are substantial: when asked about reform across the country, a majority of Democrats (59%) agreed, though 70% of Republicans also agreed. When asked about Colorado specifically, only 30% of Democrats agreed that reforms are needed in Colorado, while a majority of Republicans (55%) agreed that reforms are need in Colorado.

Last but not least, we asked Coloradans about their experiences with the mail voting system in Colorado. While a minority – but nontrivial proportion – of Coloradans worry about privacy (34%) or their ballot getting lost (39%), interestingly Republicans *and*

Proposition FF

For this analysis, we asked the question in 2 ways. Respondents were split randomly between these questions with a probability of .5. The purpose of this split was to see if the language (which appears on the ballot) would lead respondents to support or not Proposition FF, and whether the wording influenced whether respondents offered an opinion (vs. saying they were “not sure”). Some
